Goal 3	<i>NSA Join the LinkedIn community</i> Increase awareness for the Slag Industry, and the NSA.	Join LinkedIn	Erica, Charles, Jim, Al			Thank you Erica!	

Allied and Alliance Membership Supports the National Slag Association Mission

The Iron, Steel and Slag Processing Industries are “**Partners in Technical, Environmental, Safety, Operations, and National Acceptance of Slag**”. Our common goals are to produce high quality slag safely, be good neighbors in our community and maintain slag as a material of choice; good stewardship for the environment.

Benefits to your Company/Plant being a member of the National Slag Association – Be a partner in safely producing high quality slag so that it remains a product with markets that consume every ton produced.

- **Safety – Industries profit from a safe work environment**
 - Partner in a comprehensive safety program to reduce injury incidents
 - Common ground for both slag processors and steel mill operators
 - Our employees work side by side to safely create and use quality products
 - Jointly understand the safety hazard potential in equipment and operations
 - Partner with original equipment manufacturers (OEM) and Allied/Alliance members to improve safety at every site
 - Shared knowledge and training on safety procedures & emergency response
 - Pro-active safety assessments produce safer working conditions for our industry
- **Environmental – Being Good Neighbors is “good business”**
 - Common Voice to State and Federal Regulators
 - Coordinated response to confront state regulatory barriers and issues
 - Risk Analysis – Ongoing and Up-to-date
 - Jointly develop Sustainability/Life Cycle Assessment Models
 - Working together to eliminate barriers that jeopardize our businesses
- **Technical – National Acceptance of Slag is the key to future profits**
 - Joint R & D to improve slag quality and steel mill efficiency and products
 - Coordinated response to slag quality concerns and use barriers
 - Slag Research Archives available to steel industry members of NSA
- **Lobbying – Lets be proactive to protect our industry**
 - Codify Slag as a product
 - Legislative support at State level
 - Industry Relationships at Federal Agencies: EPA, FHWA, & USDA

National Slag Association Committees need your participation – Your representatives can participate in all committee activities and meetings. Let’s learn from each other and work together for national acceptance of slag, safer workplaces and improve understanding for our industries.

Safety Committee - Plant Operators Committee - Materials Mgmt (Purchasing) Committee - Environmental Committee - Technical Committee - Marketing Committee - Allied Members Committee

Allied Members Mission:

The NSA Allied Member Committee represents those companies that actively support the Iron, Steel and Slag industries, with goods, services and solutions. Allied Members and their committee work with the Purchasing and other committees to achieve best practices. Better, Safer, and more Efficient practices increase profitability for all members

Addition of the Alliance Member Level in the National Slag Association

- The NSA Relies on Allied Members that actively support the Iron, Steel and Slag industries, with goods, services and solutions.
- The majority of Allied Members are Companies who bring products/solutions to NSA Member Companies, on a National and International level.
- In 2019, the NSA added an "Allied Member Committee", to Encourage Allied Members to take a more active role in the NSA.
- Allied Members share our experiences with all of the NSA committees; providing solutions from other sites, as well as other industries, and businesses.
- The Allied Members are but one group of people who spend time at all of the active Member sites.
- The Covid Shutdowns didn't stop the Industry, but it changed the way NSA committees worked.
- Allied Members spend time "visiting sites", and tend to work from the Top down.
- Alliance Members are locally supportive of a site.
- Sites rely on the daily support they get from local companies.
- Local companies supporting the sites, are the backbone of the Alliance Membership.
- The Site and Alliance Members are the "Boots on the Ground" workers.
- Ideas and communication are greatly enhanced with additional perspectives of the Alliance Member level.
- Allied & Alliance Members will work together for sharing information and provide training, that directly benefits the sites, and Members of the NSA.

NEW MISSION STATEMENT

Allied/Alliance Members Mission:

The NSA Allied/Alliance Member Committee represents those companies that actively support the Iron, Steel and Slag industries, with goods, services and solutions. Allied/Alliance Members and their committee work with the Purchasing and other committees to achieve best practices. Better, Safer, and more Efficient practices increase profitability for all members

Overview

Since 1918, the National Slag Association (NSA) has promoted the use of Blast Furnace and Steel Furnace Slag. Blast Furnace Slag has been called the "All Purpose Aggregate" as it can be used in all construction applications as either a normal weight or lightweight (expanded or pelletized) aggregate depending on how it was formed and processed. Blast Furnace Slag is also quickly quenched by water or air to Granulated Blast Furnace Slag.
