SEEN ANTI COLLISION SAFETY DEVICE

Protect your pedestrian workers from accidents and injury caused by forklifts and other heavy mobile equipment

- .Prevent your workers being hit by reversing machines
- .Prevent property damage, by detecting objects marked with reflective tape
- .Warn when someone enters a fixed exclusion zone

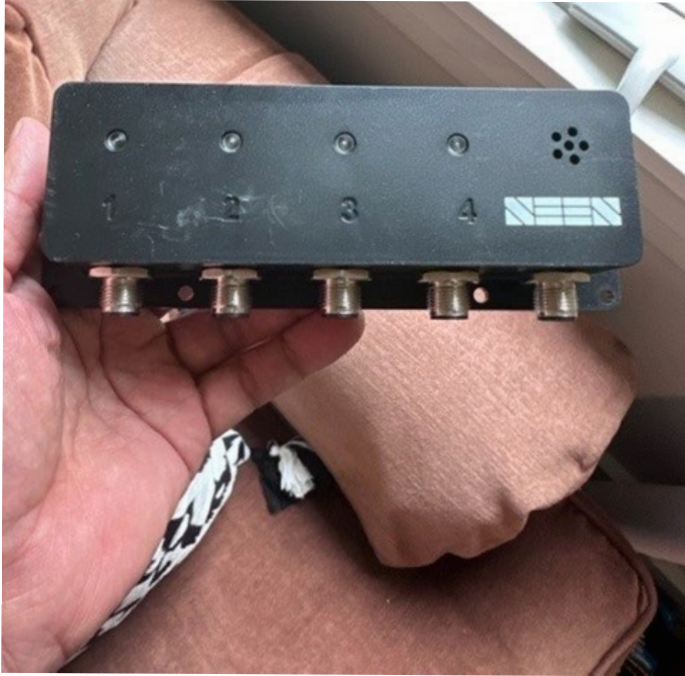

The SEEN Safety System is a simple, effective, affordable way to protect your vital assets.

SEEN COMPONENTS FOR DEVICE

CONTROLLER UNIT MOUNTED IN CAB

**CAMERA AND SENSOR UNIT MOUNT
TO THE BACK OF MACHINE**

The system is simple, its comprised of 2 products, the IRIS 860 SENSOR and the IRIS-i CAMERA and depending on operating environment a variety of accessories

Are your pedestrian workers separated from your mobile equipment?

If your facility design and workflow layout means pedestrian workers need to work in proximity to your mobile equipment, then adding an additional active safety control is a smart idea. SEEN sensors offer a highly effective and practical way to improve the safety of ground personnel in critical risk zones around your mobile equipment.

Do your workers wear high-visibility PPE?

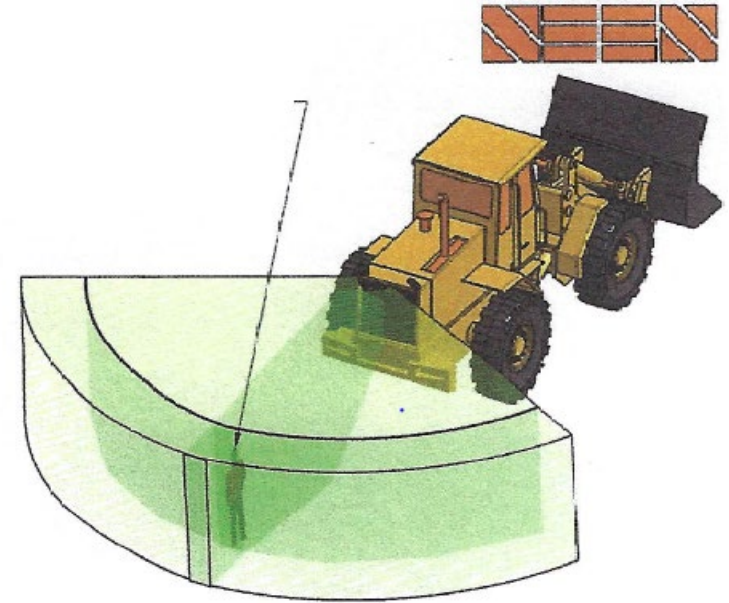

If your workers are wearing high-vis PPE with reflective tape, they should be detectable.

Can your locations be dusty, dirty, poorly lit, wet and/or cold?

Because SEEN sensors don't require a clear optical image to enable detection, they still offer reliable detection even in environments where dust, dirt, water, and condensation may be present on the sensor windows. SEEN sensors can also detect in total darkness or direct sun glare. If reliability of detection in all conditions is important to you, SEEN sensors are a great choice

The  safety system enables you to monitor, manage, and mitigate pedestrian-collis

“Be Safe, Be Seen”

MICRO BRIGHT™ BEACON

The Smallest Beacon to have a Big-Beacon Impact.

The Microbright Beacon has been proven in OEM applications around the world.

The Microbright Beacon is the perfect strobe light for:

- Construction Vehicles
- Delivery Vehicles
- Lawn Equipment
- Tractor Trailers
- Tow Vehicles
- Volunteer Fire/Police
- Snow Plow Vehicles
- Agricultural Vehicles.

MADE IN USA

Micro Bright Beacon

Introducing the smallest, most durable warning beacon in the industry.

Product Features

- 12X lower profile than traditional beacon lights
- 10X lighter
- 1/2 the diameter of a traditional beacon lights
- Completely sealed
- Solid over-mold construction
- No moving parts
- IP67 rated
- Efficient, over-molded lenses

The Issue

Big or small alike, visibility is a huge issue, not only from the machine but the surroundings as well.

Improving this starts with being

Some safety systems sound good in theory...

Ours actually works!

"Easy to implement, no external equipment to be managed or charged, requires only basic PPE to be functional."

Logistics Manager — Seafood

Forklifts

"We've had a reduction in incident risk and behaviour change"

"Works great for a site our size"

Fleet & Facility Supervisor

Forklifts

National Feedmill Manager — Poultry

Wheel loaders
